

## **Joe Christopher – Shelford Parent Governor Statement**

As a parent at Great and Little Shelford with a child in Year 1, and another starting at Rainbow Preschool, I am eager to contribute to our school's continued success and the wellbeing of all our pupils. My professional background is as a medical doctor in Paediatrics, and more recently in Clinical Genetics. In my current role, I work closely with children and families to navigate a range of complex requirements, which requires clear communication, objective analysis, and dedicated advocacy.

Safeguarding and child welfare are central to my daily clinical practice. I have extensive experience coordinating care to ensure children are protected and supported, and I believe this expertise allows me to offer a balanced, informed perspective to the Governing Board. If elected, my goal is to act as a supportive partner to the school's leadership, ensuring that our high standards for education, safety, and inclusion are met with professional rigour.

My priorities would include:

- \* **Safeguarding and Wellbeing:** Using my professional experience to support the school's commitment to providing a safe, secure environment for every child.
- \* **Inclusion and SEND:** Ensuring that children with additional needs are effectively supported to reach their full potential.
- \* **Community Engagement and Curriculum Enrichment:** I am particularly interested in strengthening the links between the school and our surroundings. I want to help the school draw upon the diverse and talented community within the Shelfords, as well as the wider Cambridge area, to provide a truly enriched and inspiring curriculum for our children.

I am fully committed to the four-year term and have the time and energy to dedicate to this important role. I would welcome the opportunity to serve our school community.
