Changes to Isolation Periods

The isolation period is still 10 days but can be reduced to 5 full days (as long as your child is well enough and without a temperature) and receives 2 consecutive negative LFD results. The earliest they should take the first LFD test is on day 5.

Any **positive test** after a first **negative test** would mean that the first negative is **null and void**. This would **reset** the isolation period and your child would still require 2 consecutive negative tests from this point forward. You must register results with the <u>NHS Website here</u> and you must e-mail both those results to school. You can order a pack of <u>LFD tests here</u>.

In any scenario, the isolation period can only end if your child no longer has a high temperature. This applies even if they have tested negative twice. If children still have a high temperature after Day 10, they should stay off school and seek medical advice such as contacting your GP or phoning 111.
